Technical Notes:

Rates are per 100,000 Population

Age-adjusted mortality rates (AA Rate) are based on 2000 US Census Bureau data summarized by district as defined by the Kansas Legislature. Because population for legislative districts is not estimated annually, statewide rates will vary from rates using more current population data.

Rates for counts below 20 are statistically unreliable and are not reported.

Birth mother's race and ethnicity have been coded into mutually exclusive population groups. For births, counts of unknown birth characteristics have not been subtracted from totals to arrive at percentages. Percentages may not add to 100 % due to rounding.

NR = Rate not reliable
