All Cancer	25	18.2 %	20.6 %
Alzheimer's	7	5.1 %	4.8 %
Tobacco Related Deaths	16	11.7 %	15.3 %

Selected Leading Causes of Death by Count for District

#### Technical Notes:

General mortality rates are per 100,000 population. Infant mortality rates are per 1,000 live births.

AA Rate is the Age-adjusted mortality rate based on 2000 US Census Bureau counts summarized by district as defined by the Kansas Legislature. Because population for legislative districts is not estimated annually, statewide rates will vary from rates using more current population data.

Rates for counts below 20 are statistically unreliable and are not reported.

Birth mother's race and ethnicity have been coded into mutually exclusive population groups.

Percentages may not add to 100 % due to rounding.

Unknowns are excluded in calculating percents and rates.

NR = Rate not reliable

Our Vision – Healthy Kansans Living in Safe and Sustainable Environments

As the state's environmental protection and public health agency, KDHE promotes responsible choices to protect the health and environment for all Kansans. Through education, direct services, and the assessment of data and trends, coupled with policy development and enforcement, KDHE will improve health and quality of life. We prevent illness, injuries and foster a safe and sustainable environment for the people of Kansas.
